Substrate for Shrimp Aquariums

Fluval Shrimp Stratum is the ideal substrate for shrimp and planted aquariums, featuring light non compacting porous structure. Its ideal properties as an aquarium substrate are highly beneficial to nitrifying bacteria which rapidly colonize the vast porous surface, providing optimal water quality for shrimp.

- Provides Safe Environment for New Born Shrimp
- Promotes Neutral to Mildly Acidic pH

12685 - 2kg Shrimp Stratum

12686 - 4kg Shrimp Stratum

CO₂

FLUVAL CO₂

Aquatic Plants require CO₂ to grow and remain in optimal condition. The Fluval Pressurised CO₂ and Mini CO₂ Kits ensure that optimal levels of CO₂ are available in the aquarium to maintain vigorous, lush and vibrant aquarium plants.

The Fluval Mini Pressurised CO₂ Kit is the ideal system that provides the necessary carbon source to maintain lush, vigorous and vibrant aquarium plants. To guarantee perfect conditions for aquarium plants appropriate lighting and fertilising is highly recommended.
