

MIND GAMES

INTERACTIVE SMART TOY

A fun, interactive game for you and your dog

Physical exercise and mental stimulation are important for your dog's well-being. Working with your dog's natural hunting instincts,

Dogit® Mind Games provides your dog with a fun, engaging experience that challenges both his mental & physical abilities.

3 GAMES-IN-1

Each one designed to encourage your dog's problem-solving skills while promoting bonding and playtime with your pet.

1. HIDE-AND-SEEK

Hide treats inside the nooks and cover with the pop tops. The dog has to dislodge the top in order to find the treat and claim his "reward".

2. SPIN-A-WHIRL

Hide treats inside the nooks and conceal them with the spin-a-whirl wheel. As the dog nudges the wheel, it slides around the board to reveal the treats.

3. SLIDING PUZZLE

Insert the white centerpiece and the hide-and-peek game changes to a sliding puzzle. The dog has to slide the pop tops around the board to uncover hidden treats.
